

**UNIVERSITY OF CALIFORNIA, IRVINE
CONSENT TO ACT AS A HUMAN RESEARCH SUBJECT**

Sensory Discrimination, Processing Speed, and and Cognitive Functions

Lead Researcher

Jeffrey Rouder, Professor, University of California Irvine
Department of Cognitive Science
jrourder@uci.edu

STUDY LOCATION(S):

Social and Behavioral Sciences Gateway, Room 2323

STUDY SPONSOR(S):

Office of Naval Research

SUMMARY OF KEY INFORMATION:

The information provided in this box includes a brief yet complete summary of key information about the research, presented first as required by the federal regulations. Some sections that require additional information may be repeated later in this document.

Participation is Voluntary

You are being asked to participate in a research study. Participation is completely voluntary. Please read the information below and ask questions about anything that you do not understand. A researcher listed above will be available to answer your questions.

Study Purpose

The purpose of this research study is to understand how sensory discrimination and processing speed relate to higher-order cognitive function.

Study Procedures

You will be asked to complete a total of ten perceptual and cognitive tasks on a computer in our laboratory's experiment room. During these tasks, you will view visual displays presented on the computer screen. Following the on-screen instructions, you will be asked to respond to these visual displays using the keyboard and mouse.

Expected Duration

The study will take place across three separate days, each lasting approximately one hour.

Risks of Participation

Your eye might feel tired or uncomfortable after one-hour exposure to the visual displays on the computer. You might feel upset about your performance in these tasks. Also, should there be a breach in confidentiality of your data, there is a slight risk that your private information could be shared with individuals who are not members of the study team.

Benefits to Participants

You will not directly benefit from participation in this study.

Benefits to Others or Society

This study contributes by clarifying how perceptual processes support higher-order cognition function. The society can perhaps learn how to train their perceptual abilities for better cognitive function.

Alternative Procedures or Treatments

There are no alternative procedures available. The only alternative is not to participate in this study.

HOW MANY PEOPLE WILL TAKE PART IN THIS STUDY?

This study will enroll approximately 150 participants. All study procedures will be done at Social and Behavioral Sciences Gateway, Room 2323

AM I ELIGIBLE TO PARTICIPATE IN THIS STUDY?

You must meet the following requirements to be in the study: UCI student with normal or corrected-to-normal vision.

WHAT PROCEDURES ARE INVOLVED WITH THIS STUDY AND HOW LONG WILL THEY TAKE?

Participation in the study will include about 3 one-hour over a period of 2 weeks. During each visit, you will be asked to complete 3-4 perceptual and cognitive tasks on a computer in our laboratory's lab experiment room. You will have 3-5 minutes rest time between tasks.

WHAT ARE THE POSSIBLE DISCOMFORTS OR RISKS RELATED TO THE STUDY?

Your eye might feel tired or uncomfortable after one-hour exposure to the visual displays on the computer. You might feel upset about your performance in these tasks. Also, should there be a breach in confidentiality of your data, there is a slight risk that your private information could be shared with individuals who are not members of the study team.

WILL I BE PAID FOR TAKING PART IN THIS STUDY?

The total payment will be 45 dollars for 3 hours experiment (15 dollars for each hour) + 5 dollars based on completion = 50 dollars.

Reimbursement

You will not be reimbursed for any out of pocket expenses, such as parking or transportation fees.

Costs

There is no cost to you for participation in this study. However there may be out-of-pocket expenses such as parking and transportation fees.

WHAT HAPPENS IF I WANT TO STOP TAKING PART IN THIS STUDY?

You are free to withdraw from this study at any time. **If you decide to withdraw from this study you should notify the research team immediately.** The research team may also end your participation in this study if you do not follow instructions, miss scheduled visits, or if your safety and welfare are at risk.

If you withdraw or are removed from the study, you will receive 15 dollars for each hour participation

HOW WILL MY PERSONAL INFORMATION BE KEPT?

Subject Identifiable Data

The study will involve the collection of identifiable private information, such as participant names, contact information, and study-specific identifiers. Identifiable information collected about you will be removed and replaced with a code. A list linking the code and your identifiable information will be kept separate from the research data. We use this linking list to collate your data across the three days.

Data Storage

Research data will be stored electronically on the lab experiment computer and lab github, both of them are password protected.

Data Retention

In accordance with UC Office of the President policy, information related to personal identifiers will be retained for 10 years after the end of the calendar year in which the research is completed. However the de-identified information will be kept.

WHO WILL HAVE ACCESS TO MY STUDY DATA?

The research team, authorized UCI personnel, the study sponsor (Office of Naval Research) and regulatory entities such as the Office of Human Research Protections (OHRP), may have access to your study records to protect your safety and welfare.

While the research team will make every effort to keep your personal information confidential, it is possible that an unauthorized person might see it. We cannot guarantee total privacy.

Future Research Use

Researchers will use your information to conduct this study. Information gathered during this research study will only be used for this study. They will not be shared with other researchers.

WHO CAN ANSWER MY QUESTIONS ABOUT THE STUDY?

If you have any comments, concerns, or questions regarding the conduct of this research, please contact the research team listed at the top of this form.

Please contact UCI Institutional Review Board by phone, (949) 824-8170, by e-mail at IRB@research.uci.edu or by mail at University of California, Irvine, Office of Research, Irvine, CA 92697-7600, if you are unable to reach the researchers listed at the top of the form and have general questions; have concerns or complaints about the research; have questions about your rights as a research subject; or have general comments or suggestions.

What is an IRB? An Institutional Review Board (IRB) is a committee made up of scientists and non-scientists. The IRB's role is to protect the rights and welfare of human subjects involved in research. The IRB also assures that the research complies with applicable regulations, laws, and institutional policies.

ARE THERE OTHER ISSUES TO CONSIDER IN DECIDING WHETHER TO PARTICIPATE IN THIS STUDY?

Future Contact

The study team would like your permission to contact you for future research. Please initial your level of permission below:

_____ Yes, UCI researchers may contact me in the future to ask me to take part in other research studies.

_____ No, UCI researchers may **not** contact me in the future to ask me to take part in other research studies.

HOW DO I AGREE TO PARTICIPATE IN THIS STUDY?

You should not sign this consent form until all of your questions about this study have been answered by a member of the research team listed at the top of this form. You will be given a copy of this signed and dated consent form to keep. **Participation in this study is voluntary.** You may refuse to answer any question or discontinue your involvement at any time without penalty or loss of benefits to which you might otherwise be entitled. Your decision will not affect your future relationship with UCI or your quality of care at the UCI Medical Center.

Your signature below indicates you have read the information in this consent form and have had a chance to ask any questions you have about this study.

I agree to participate in the study.
